Rocket ICO to achieve 25% ICO market share

\$100 m

# Growing Market of ICO

The ICO market is booming, but today many scam projects, incompetent teams come to it. There is a lack of professional expertise on the market.

We solve this problem by creating a decentralized acceleration platform Rocket ICO. Independent experts get access to projects at the platform, increasing their rating and being paid for the work, while investors receive information on the most attractive projects.

## ICO VS Venture Capital

Q2 2017 Blockchain Funding

● ICO ● VC

# Platform and Financial Tools

After receiving funding the project teams start to work directly on the platform, using such convenient tools as smart contracts design, white paper and landing page builders, the system of interactions inside and between the teams.

As a platform currency, Rocket coins provide compensation to each project participant in accordance with their contribution. Thus, anyone can monetize their knowledge, efforts, or increase their investments and, with the development of the platform, Rocket coin will become more in demand.

# Investors

- Investor's funds are protected by the virtue of smart contracts
- Investors have full visibility of budget spending on projects in real time
- Early exchange listings provides maximum flexibility and control over the funds, avoiding lengthy lock-up periods
- In many projects tokens give the rights to receive not only profits, but also voting rights, unique features and etc.

# Experts

- Access to a pull of different investors (Funds, Business Angels, VCs, Crypto Enthusiasts)
- Startup receives support from expert community on each step of product development
- Startup has a full visibility over expert's competency recorded on the platform through his activity and rating
- After receiving funding Startup proceeds to product development right on the platform
- Startup is provided with access to platform built in tools and is able to grant different permission levels for different parties involved

# Projects

- Ability to monetise your knowledge and expertise
- Ability to participate in attractive innovative projects in exchange to providing knowledge, expertise and fulfilling various tasks
- Arbitrage system will help to solve any unexpected disputes with client
- Each expert will have a competency scope, by virtue of which he will be able to better communicate his expertise and find an "ideal" project to participate in
